Art Unit 1713

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 7, 8, 12-15, 17-26, 49, 50 and 51 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hagenbach et al., U.S. Patent 4,567,222.

Reference to Hagenbach et al. specifically teaches the required polysulfide compounds in combination with the polymers as claimed by applicant. The reference further teaches these compositions for use with bitumen in bitumen-polymer compositions. The polymers are taught with a molecular weight of

applicant's claims being specifically taught, although not preferred, in column 4. The different types of polymers are taught in column 1. The choice of specific polymer would be at least prima facie obvious if not specifically anticipated by the teaching of column 1 for use of these polymers in the taught compositions. Applicant's claimed compositions are, therefore, either fully anticipated or, at the very least, rendered prima facie obvious from the teaching of the reference to Hagenbach et al.
